

Press Release

heroal Insulation Box System Sets New Standards in Thermal Insulation

At BAU 2019, heroal presents the innovative insulation box system heroal IB Unique. The system is not only characterized by the best insulation values for every application, it also ensures space-saving storage as well as quick and easy manufacture and assembly due to the simple functionality of the super-Z-folding installation technology.

SIMPLY BETTER. INSULATED.

The new insulation box system heroal IB Unique offers best and at the same time flexible insulation values. Due to its modular design, the system can be adapted to the most varied installation scenarios: the insulation box can be used for low energy houses such as the passive house and be equipped with different systems (roller shutters, insect screens and the zip screen system heroal VS Z); it is suited for brickworks, ETICS, plaster and clinker brick facades.

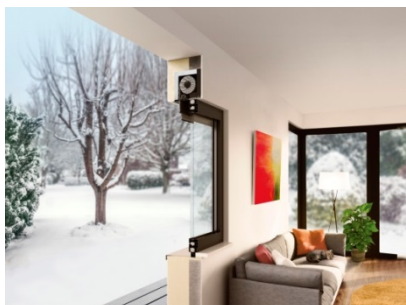

Super-Z-Folding Installation Technology

The special folding technology of heroal IB Unique makes space-saving storage and easy transportation possible, at the same time ensuring optimum stability for further processing. Folded in the form of the letter Z, it can be cut to size easily and quickly. Once the box is folded apart, it is held in place by adhesive tape and can be safely installed.

Your Advantages – the heroal IB Unique

Apart from the advantages regarding storage and logistics, the clearly structured range with its three sizes and three performance classes also renders the manufacture highly efficient. If required, additional equipment is available – for example additional soundproofing inserts. heroal is the sole supplier of system solutions designed to close and shade a multitude of building apertures, and with its insulation box system heroal IB Unique creates the optimum interface for the symbiosis of both segments: doors and windows as well as roller shutters and sun protection – everything from one source.

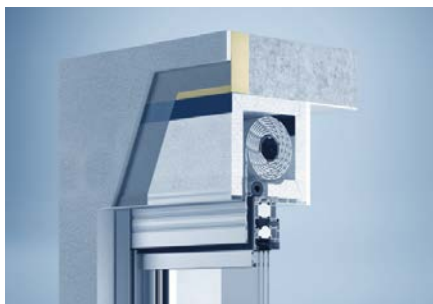

Image Material

heroal – the aluminium systems supplier

As a leading supplier of aluminium systems, heroal develops and produces perfectly coordinated systems for windows, doors, facades, roller shutters, roller doors and sun protection. Folding and sliding shutters, insect protection, terrace roofs and carports round off the product range. By minimising energy consumption during production, maximising energy conservation during usage as well as ensuring optimum profitability during system manufacturing and an increase in the value of the building, heroal system solutions make a significant contribution to sustainable construction.

Innovation, service, design, sustainability

The heroal brand represents system solutions that unite practical innovations, industry-leading service and high-quality design that can be sustainably integrated into any architecture.

Over 800 employees across the company work continually to further develop the systems and optimise the quality of heroal's service and performance.

The heroal brand stands for premium quality made in Germany – certified according to ISO EN 9001. heroal products and systems are produced and assembled exclusively at heroal's German production sites – at its headquarters in Verl and also in Hövelhof.
